

Assembly Instructions

1. Position the Pronto on the ground so the stabilizing foot at the base of the unit can be turned to a 90° angle. This insures balance and stability.
2. Remove the mast from the slot on the back on the unit.
3. Insert the mast into the hole located in the center of the Pronto unit.
4. Extend the mast to one of three standard height settings that match the size of your graphic.
5. Unroll the graphic from the Pronto by pulling the aluminum hanger towards the top of the mast.
6. Secure the graphic by placing the hook on top of the mast.

Lighting

7. Install the lamp by placing the mounting sleeve over the top of the mast.

Recommendation

To close the display, carefully roll the graphic back inside the Pronto case. Make sure to guide it manually to avoid damaging the edges of the graphic.
